

FILTAN BDH

Synthetic tannin of substitution - Phenolsulphonic acid condensate

CHARACTERISTIC	SPECIFICATIONS	UNIT OF MEASURE
Appearance	Fine powder from white to light yellowish coloured	
pH (1:10)	3,5 approx +/- 0,5	
Dry residue	95 min.	%

FILTAN BDH is a new generation tanning agent with low Bisphenol S and Bisphenol F content, particular suitable for the production of soft and full leathers.

It gives a pleasant touch to the leather without prejudice either the structure compactness or the grain firmness giving a particular filling in the empty parts of the leathers.

It can also be used with vegetable tanning agents for bleaching.

FILTAN BDH is used in the retannage of chrome tanning in particular for footwear varying the quantity according to the required fullness and softness.

APPLICATION

The optimal quantity to be used is 6%-10% on the shaved weight and varies with the used types of raw materials.

Storage: 6 – 12 months. Keep the product in intact, well closed original packaging, in cool and dry place, away from heat sources. Close the container tightly after use
