

FILTAN GN

Synthetic tannin of substitution - Didroxydi phenol sulphone condensate

CHARACTERISTIC	SPECIFICATIONS	UNIT OF MEASURE
Appearance	White powder	
pH (1:10)	4,1 +/- 0,2	
Dry residue	≥ 92	%

FILTAN GN used alone in tanning allows to obtain a full and soft leather of a perfect light fast white colour. Thanks to its slight astringent power it allows to obtain a very fine grain.

FILTAN GN has a vast gamma of use also for bleaching chrome and vegetable tanned leathers and gives excellent results in the retanning of chrome leathers to which it gives a fine grain and soft feel.

In all cases thanks to its chemical structure it bestows leather an excellent fullness and softness.

Storage: 6 – 12 months. Keep the product in intact, well closed original packaging, in cool and dry place, away from heat sources. Close the container tightly after use. **FILTAN GN** is light fast, but sensitive to iron salts. The necessary precautions must therefore be taken to prevent the formation of stains and shadings. Moreover the product is hygroscopic.
