

## LEDERTAN WA

Vegetal tanning agent Tara based

CHARACTERISTIC	SPECIFICATIONS	UNIT OF MEASURE
Appearance	Beige homogeneous powder	
pH (1:10)	4 +/- 1	
Dry residue	95-96 ca.	%

**LEDERTAN WA** being basically a vegetable tannin acts as all the tanners belonging to this category; it is characterized by the good light fastness and for the light colour it bestows to treated leather.

**LEDERTAN WA** is employed in retanning of semichrome articles, where it determines a fine and flat grain, and doesn't load excessively and allows to obtain brushed effects of good sealing.

### APPLICATION

In vegetal tanning along with Mimosa Estratto obtain very light hides. Percentages can vary depending on the article required; in retanning wet-blue leather along with Quebracho and other vegetable products in a percentage of 2-6% it favours the distribution of tanning agents without overloading grain.

**Storage:** 6 – 12 months. Keep the product in intact, well closed original packaging, in cool and dry place, away from heat sources. Close the container tightly after use.
