

## **PAROLIT ELX**

Carboxylated copolymer

| CHARACTERISTIC   | SPECIFICATIONS | UNIT OF MEASURE |
|------------------|----------------|-----------------|
| Appearance       | Milky liquid   |                 |
| pH (1:10)        | 8,0 +/- 0,5    |                 |
| Active substance | 50% +/- 2      | %               |

**PAROLIT ELX** is a carboxylate copolymer that gives the leather exceptional firmness and fullness combined with a closed, rounded feel.

In the drums it should be used at pH >7 and later acidified to increase the filling effect.

It can also be used in finishing due to its covering and sealing properties and a film that is soft and non-sticky.

Storage: 6 – 12 months. Keep the product in intact, well closed original packaging, in cool and dry place, away from heat sources. Shake always before use. Close the container tightly after use.
