

SOSTENPEL BCM

Basifying auxiliary

APPEARANCE	Off white to grayish powder
pH VALUE (1:10)	12,0 +/- 1,0
ACTIVE SUBSTANCE	94% minimum.

SOSTENPEL BCM is a basifying and neutralizing auxiliary offering:

- special salts-based product with very scarce solubility and slow release of basifying alkali for proper self-basification to the desired pH
- properly applied gives extra reaction of the tanning salt used improving the fullness and roundness of the leather with a very uniform color 0.5-1.0% and with greater impact on tanning effluent for the lesser amount of polluting material present
- apply for double face tanning basifying for perfect metal fixation without any plumping action that may reduce the softness and elasticity of the fibers 0.4- 1%
- the product shall never be applied together with SOSTENPEL BAM to avoid any flocculation that may reduce or cancel both product effect

Storage: 6 -12 months. Keep the product in intact, well closed original packaging, in cool and dry place, away from heat sources. Close the container tightly after use. Close the container tightly after use
