

SOSTENTAN TRN

Tanning agent for wet-white

COMPOSITION

Organic tanning agent

APPEARANCE

Liquid from colorless to straw

pH VALUE (1:10)

10,0 +/- 1,0

DRY RESIDUE

45% +/- 3

Il SOSTENTAN TRN is a tanning agent with great affinity with natural proteins.

In pretannage on pickled leathers permits the preparation of wet-white in combination with vegetable and synthetic tanning agents and produces a softer, fuller leather, clearly lighter if compared with leather prepared without the use of SOSTENTAN TRN.

Apart from its use in pretanning, it can be used in various stages of the leather production in variable quantities depending on the required article.

APPLICATION

The major advantages of its use are:

- Improves exhaustion of the chrome baths
- Fuller and softer leather
- White wool if used with leather with wool-on
- Significantly brighter leather
- Neutralising and fixing capabilities if used in chrome tannage

Storage: 6 – 12 months. Keep the product in intact, well closed original packaging, in cool and dry place, away from heat sources. Shake always before use. Close the container tightly after use.
